

**PRODUCT DATASHEET**

## Pedestrian Gate

*The Floodbreak Pedestrian Gate is a fully-engineered system that will automatically protect pedestrian entrances from street-level flooding. When not deployed, the gate remains hidden underground and with zero impact on pedestrian traffic. The system can be covered with a variety of materials, including carpet, pavers, or tile.*

**Doorways \* Entrance Foyers \* Stairwells \* Elevator Lobbies**

### Revolutionary Flood Control

Like the rest of FloodBreak's passive flood mitigation product line, the Pedestrian Gate is fully automatic and does not depend on people or power to deploy. It is the only practical, truly passive flood control solution - the preferred method according to FEMA.

### The Smart Choice

FloodBreak has been protecting customers since 2002. Major hospitals, governments, and commercial facilities all rely on FloodBreak's 24/7 flood protection. In the past two years alone, there have been 12 identified flood saving deployments.

### How It Works

The FloodBreak system uses hydrostatic pressure created by the rising flood waters to automatically activate the gate. When the flood recedes, the gate automatically returns to its hidden position beneath the ground allowing pedestrian traffic to resume.

### Features:

- Passive flood mitigation preferred by FEMA
- Manufactured to exact size requirements
- Weather resistant materials & durable rubber gaskets
- Minimal maintenance
- No training required
- Easy to install
