

## Vehicle Gate

The FloodBreak Vehicle Gate is a fully-engineered system that will automatically block entrances from street-level flooding. Using FloodBreak's passive flood mitigation technology, these vehicular gates provide worry-free flood protection 24/7 while allowing full access to your facility.

**Driveways \* Loading Docks \* Garage Ramps \* Equipment Bays**

### Revolutionary Flood Control

Like the rest of FloodBreak's passive flood mitigation product line, the Vehicle Gate is fully automatic and does not depend on people or power to deploy. It is the only practical, truly passive flood control solution - the preferred method according to FEMA.

### The Smart Choice

The FloodBreak Vehicle Gate has been protecting customers since 2002. Major hospitals, governments and commercial facilities all rely on FloodBreak's 24/7 flood protection. In the past two years alone, there have been 12 identified flood saving deployments.

### How It Works

The FloodBreak system uses hydrostatic pressure created by the rising flood waters to automatically activate the gate. When the flood recedes, the gate automatically returns to its hidden position underneath the ground allowing full access to the facility.

### Features:

- Passive flood mitigation preferred by FEMA
- Manufactured to exact size requirements
- Weather resistant materials & durable rubber gaskets
- Minimal maintenance
- No training required
- Easy to install
